

SciVal Training Outline

Alvin Sherman Library | Nova Southeastern University

Program Overview

This training program introduces the core features of SciVal and supports users in building confidence when working with research analytics tools. Each module includes guided instruction, interactive activities, and knowledge checks to reinforce learning.

The full course is estimated to take 9 hours to complete. However, users are not required to complete the entire program. You are welcome to move through the modules at your own pace and focus on the sections that best meet your needs.

Each module includes:

- Instructional content
- Practice activities
- Discussion opportunities
- Assessment

By the end of this program, participants will be able to:

- Navigate SciVal's interface & tools effectively
- Interpret research metrics & indicators
- Analyze institutional & researcher performance
- Generate & customize reports
- Apply SciVal strategically within an academic setting

Learning Objectives

Module 1: Getting Started with SciVal

Focus: Platform basics & navigation

Topics Covered:

- Accessing & setting up SciVal
- Understanding available data entities
- Exporting visualizations & datasets

By the end of this module, you will be able to:

- Navigate key areas of the platform
- Recognize different data entities within SciVal
- Export charts & data for use in reports

Module 2: Understanding Research Metrics

Focus: Foundations of bibliometrics

Topics Covered:

- Publications & citation data
- Journal-level metrics
- Research collaboration indicators

By the end of this module, you will be able to:

- Interpret publication & citation data
- Describe common journal metrics
- Explain how collaboration impacts research visibility

Module 3: Institutional Analysis & Insights

Focus: Evaluating institutions & research trends

Topics Covered:

- Exploring institutional data
- Comparing institutions using key indicators
- Understanding research topics & prominence
- Using visual tools like topic heatmaps
- Reviewing rankings & SDG-related insights

By the end of this module, you will be able to:

- Analyze institutional research performance
- Compare multiple institutions effectively
- Interpret topic trends & prominence indicators
- Use visualization tools to support analysis
- Apply rankings & global impact frameworks

SciVal Training Outline

Alvin Sherman Library | Nova Southeastern University

Module 4: Researcher & Group Analysis

Focus: Working with individual & group data

Topics Covered:

- Managing researcher profiles
- Importing researcher data in bulk
- Creating & analyzing researcher groups

By the end of this module, you will be able to:

- Use researcher-focused tools within SciVal
 - Upload & organize multiple researcher profiles
 - Analyze performance at both individual & group levels
-

Module 5: Reporting & Data Presentation

Focus: Creating & customizing reports

Topics Covered:

- Overview of reporting features
- Using pre-built report templates
- Designing custom reports
- Building advanced, multi-layered reports

By the end of this module, you will be able to:

- Generate reports using existing templates
 - Customize reports to meet specific needs
 - Create detailed reports for advanced analysis
-

Module 6: Implementation & Outreach

Focus: Applying SciVal within your institution

Topics Covered:

- Identifying key user groups
- Promoting responsible use of metrics
- Developing outreach & training strategies

By the end of this module, you will be able to:

- Identify potential SciVal users across campus
 - Encourage ethical & informed use of metrics
 - Design outreach plans to support adoption
-
